

# Applications of AI

## Course Description

This micro course, Applications of AI , looks into the impact that AI is having in the following 8 areas: Healthcare, Finance, Retail, Transportation, Education, Entertainment, Agriculture and the Creative Arts.

It explains how AI is helping to reduce time, increase productivity, reduce waste, analyse data and even assist with early diagnosis of diseases in certain areas.

## Learning Objectives

By the end of this course you will:

- Understand the impact AI is having in certain areas of work
- Be aware of the different aspects that AI can help with on a daily basis

## Target Audience

This course is aimed at beginners and professionals from all industries who are curious about AI.

## Advantages

Online training is flexible, efficient and cost-effective meaning the candidate can progress through the modules at their own pace and in their own time to fit the training in around their work and personal life.

## Modules
