

Compressed Gas - Moving Compressed Gas Cylinders

Course Description

This micro course will provide a general overview of the important issues surrounding compressed gas safety. It looks at the safety aspects of handling, safe storing and transportation of gases and the PPE that is required to keep you safe. It also looks at the OSHA regulations surrounding gas.

Learning Objectives

When you have completed this course, you will be able to:

- Safely transport, handle, and store compressed gas cylinders
- Understand the PPE required to keep you safe
- Have an awareness of the OSHA regulations regarding safe storage and transportation of gas cylinders

Target Audience

This course is aimed at anyone required to work with or near to compressed gases as part of their role. The course is also useful to supervisors and managers in workplaces that use compressed gases as they will need to understand the potential hazards present.

Advantages

Online training is flexible, efficient and cost effective meaning the candidate can progress through the modules at their own pace and in their own time, so they can fit the training around their work and personal life.

Modules

Course	Module Number	Module Name	Pass % Required
Compressed Gas - Moving Compressed Gas Cylinders	1	Moving Compressed Gas Cylinders	70
Compressed Gas - Moving Compressed Gas Cylinders	2	Regulations and Guidelines	70
Compressed Gas - Moving Compressed Gas Cylinders	3	Types of Compressed Gas	70

Recommended System Requirements

- Browser: Up to date web browser
- Video: Up to date video drivers
- Memory: 1Gb+ RAM
- Download Speed: Broadband (3Mb+)

Duration: 10 minutes (*Note: This is based on the amount of video content shown and is rounded off. It does not account in any way for loading time or thinking time on the questions).*
