

Ethical Considerations in AI

Course Description

This micro course looks at ethical considerations in the world of AI development to ensure that AI is used and developed responsibly. The course looks at bias, transparency and privacy and how each of these can influence the AI's decision making process.

It also looks at how AI should be used alongside human decision as opposed to replacing it completely.

Learning Objectives

By the end of this course you will understand:

- The ethical considerations of AI
- How bias, transparency and privacy can influence AI decision making

Target Audience

This course is aimed at beginners and professionals from all industries who are curious about AI.

Advantages

Online training is flexible, efficient and cost-effective meaning the candidate can progress through the modules at their own pace and in their own time to fit the training in around their work and personal life.

Modules

Course	Module Number	Module Name	Pass % Required
Ethical Considerations in AI	1	Ethical Considerations in AI	70

Recommended System Requirements

- Browser: Up to date web browser
- Video: Up to date video drivers
- Memory: 1Gb+ RAM
- Download Speed: Broadband (3Mb+)

Duration: 10 minutes (*Note: This is based on the amount of video content shown and is rounded off. It does not account in any way for loading time or thinking time on the questions*).
