

Introduction to Forklift Basics

Course Description

This micro course analyzes the different classes of powered industrial trucks, the areas in the workplace they are used in and the different types of fuel that make forklifts run.

Learning Objectives

By the end of this course, you will be able to:

- Identify the classes of powered industrial trucks that include Forklifts.
- Understand and explain OSHA legislation regarding Forklifts.
- Understand what areas in a workplace a Forklift would be used.

Target Audience

This course is aimed at those that are wanting to develop skills as a forklift operator, although it should be combined with practical training before a candidate is fully certified. The course is also relevant to warehouse and site supervisors or managers responsible for overseeing work done with forklifts where an understanding of their operation and the hazards associated with them will enable them to better perform their role.

Advantages

Online training is flexible, efficient and cost effective meaning the candidate can progress through the modules at their own pace and in their own time, so they can fit the training around their work and personal life.

Modules

Course	Module Number	Module Name	Pass % Required
Introduction to Forklift Basics	1	Introduction to Forklift Basics	70

Recommended System Requirements

- Browser: Up to date web browser
- Video: Up to date video drivers
- Memory: 1Gb+ RAM
- Download Speed: Broadband (3Mb+)

Duration: 15 minutes (*Note: This is based on the amount of video content shown and is rounded off. It does not account in any way for loading time or thinking time on the questions.*)
