

Performance Management - Successful Performance Management Planning

Course Description

In any organisation, the traditional model of strict command and control wastes a significant amount of time and money. Mutual trust, employee motivation and readiness to perform can easily be undermined.

Performance management, on the other hand, offers a different, much more effective approach.

Performance management involves the achievement of performance targets through the effective management of people and the environment in which they operate. It's about setting achievable goals for the organisation and targets for individuals and teams. This micro course explains how to successfully plan a performance management programme.

Learning Objectives

By the end of this course, you will be able to:

- Successfully plan a performance management programme.
- Understand the importance of strategies, values and long term goals
- Understand the importance of performance reviews

Target Audience

This micro course can be a great starting point for new managers or those that just want to enhance their performance management skills.

Advantages

Online training is flexible, efficient and cost effective meaning the candidate can progress through the modules at their own pace and in their own time, so they can fit the training around their work and personal life.

Modules
