

Power Tool Safety

Course Description

This course looks at the critical safety measures and operational procedures for power tools. It is designed to equip employees with the knowledge to enhance their work efficiency while maintaining the highest standards of safety.

Learning Objectives

By the end of this course, employees will:

- Understand the risks associated with using power tools and how to mitigate these.
- Understand how to use power tools safely and be informed about relevant PPE required to ensure this.
- Be aware of the importance of regular maintenance and inspection of power tools

Target Audience

This course is aimed at anyone working in the construction industry, particularly those on busy sites that use hand and power tools.

Advantages

Online training is flexible, efficient and cost effective meaning the candidate can progress through the modules at their own pace and in their own time, so they can fit the training around their work and personal life.

Modules

Course	Module Number	Module Name	Pass % Required
Power Tool Safety	1	Power Tool Safety	70

Recommended System Requirements

- Browser: Up to date web browser
- Video: Up to date video drivers
- Memory: 1Gb+ RAM
- Download Speed: Broadband (3Mb+)

Duration: 10 minutes (*Note: This is based on the amount of video content shown and is rounded off. It does not account in any way for loading time or thinking time on the questions*).
