

Protecting against Struck by Hazards

Course Description

Nearly all struck by injuries are preventable. You will get to review protective measures, safe work practices, and the use of personal protective equipment to prevent struck-by injuries on the job site.

Learning Objectives

By the end of this course, employees will:

- Have an understanding of the concepts of struck-by hazards on construction sites, their prevalence, and the importance of recognizing them to ensure safety.
- Understand about the protective measures, safe work practices, and the use of personal protective equipment to prevent struck-by injuries on the job site.

Target Audience

This course is aimed at anyone working in the construction industry, particularly those on busy sites or the supervisors and managers who will need to understand

Advantages

Online training is flexible, efficient and cost effective meaning the candidate can progress through the modules at their own pace and in their own time, so they can fit the training around their work and personal life.

Modules

Course	Module Number	Module Name	Pass % Required
Power Tool Safety	1	Protecting against Struck by Hazards	70

Recommended System Requirements

- Browser: Up to date web browser
- Video: Up to date video drivers
- Memory: 1Gb+ RAM
- Download Speed: Broadband (3Mb+)

Duration: 15 minutes (*Note: This is based on the amount of video content shown and is rounded off. It does not account in any way for loading time or thinking time on the questions).*
