

Scaffolding - Introduction to Construction Scaffolding

Course Description

This micro course discusses the basics of scaffolding, covering essential structures to safety regulations and maintenance practices and equipping construction employees with the knowledge to work safely and efficiently.

Learning Objectives

By the end of this course, you will be able to:

- Understand the basics of Scaffolding in the Construction Environment.
- Define the OSHA safety standards and regulations relating to Scaffolding.
- Recognize the importance of Inspection and Maintenance of the Scaffolding site.

Target Audience

This course is aimed at anyone working in the construction industry, particularly those on busy sites that use scaffolding

Advantages

Online training is flexible, efficient and cost effective meaning the candidate can progress through the modules at their own pace and in their own time, so they can fit the training around their work and personal life.

Further Progression

For those needing further safety in training, courses such as Fall Protection, Hand and Power Tools and PPE should be completed alongside this one.

Modules

Course	Module Number	Module Name	Pass % Required
Scaffolding - Introduction to Construction Scaffolding	1	Introduction to Construction Scaffolding	70

Recommended System Requirements

- Browser: Up to date web browser
- Video: Up to date video drivers
- Memory: 1Gb+ RAM
- Download Speed: Broadband (3Mb+)

Duration: 10 minutes (*Note: This is based on the amount of video content shown and is rounded off. It does not account in any way for loading time or thinking time on the questions*).
