

The Future of AI

Course Description

This micro course discusses what the future of AI looks like within our daily lives. It delves into how AI may be used to revolutionize healthcare and how it could also be used in education, potentially making high quality it accessible to everyone. The course touches on the topics of transportation, the impact of AI on workforces and how it can potentially be used to optimize energy use, aiding in the preservation of our planet. The course then goes on to discuss the future advancements we may see in AI.

Learning Objectives

By the end of this course you will understand:

- The potential future of AI and how it could be used in a variety of industries
- The future advancements in general AI and what that could look like in practice

Target Audience

This course is aimed at beginners and professionals from all industries who are curious about AI.

Advantages

Online training is flexible, efficient and cost-effective meaning the candidate can progress through the modules at their own pace and in their own time to fit the training in around their work and personal life.

Modules

Course	Module Number	Module Name	Pass % Required
The Future of AI	1	The Future of AI	70

Recommended System Requirements

- Browser: Up to date web browser
- Video: Up to date video drivers
- Memory: 1Gb+ RAM
- Download Speed: Broadband (3Mb+)

Duration: 10 minutes (*Note: This is based on the amount of video content shown and is rounded off. It does not account in any way for loading time or thinking time on the questions).*
